BlackRock Developed World Index Sub-Fund

A sub-fund of BlackRock Index Selection Fund

Class Institutional Accumulating EUR

ISIN: IE00B62WCL09

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the developed world equity markets.
- ▶ The Fund invests so far as possible and practicable in equity securities (e.g. shares) that make up the MSCI World Index, the Fund's benchmark index.
- ▶ The benchmark index measures the performance of the equity market of the developed markets globally and is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market. As at 01 July 2016, the benchmark index consists of the following 23 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Italy, Israel, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to it.
- ▶ The investment manager may also use financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is €1,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.

BlackRock Europe Index Sub-Fund

A sub-fund of BlackRock Index Selection Fund

Class Institutional Accumulating EUR

ISIN: IE00B4K9F548

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the European equity market.
- ▶ The Fund invests so far as possible and practicable in equity securities (e.g. shares) that make up the MSCI Europe Index, the Fund's benchmark index.
- ▶ The benchmark index measures the performance of the equity market of the developed markets in Europe and is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market. As at October 2014, the benchmark index consists of the following 15 developed market country indices: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to it.
- ▶ The investment manager may also use financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Euro, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is €1,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

An estimate is being used as the Fund has been subject to fee restructuring, impacting the ability of historic data to provide a fair reflection of future costs. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Class Institutional Accumulating EUR

ISIN: IE0031080645

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the Citigroup EuroBIG ex-EGBI Index, the Fund's benchmark index.
- ▶ The Fund invests predominantly in the fixed income securities (FI) securities (such as bonds) that make up the Fund's benchmark index (which comprises non-government bonds).
- ▶ The FI securities may be issued by companies and to a lesser extent by governments, government agencies and supranationals (e.g. the International Bank for Reconstruction and Development) domiciled in and outside the European Union.
- ▶ At the time of purchase, the FI securities will be investment grade rated by Moody's, Standard & Poor's or Fitch Ratings or are deemed by the investment manager to be of an equivalent rating. If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position.
- ▶ The benchmark index measures the performance of primarily non-government investment grade issues of FI securities and unrated FI securities issued or guaranteed by a sovereign or a supranational issuer. The benchmark index may also include securities issued by non-EMU governments and/or European Union domiciled supranationals.
- ▶ The Fund uses techniques for efficient portfolio management purposes or to protect against exchange rate risk. These techniques may include the strategic selection of certain securities that make up the benchmark index or other FI securities which provide similar performance to certain constituent securities. They may also include the use of financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.

The average time to the date that the full principal must be repaid, or if earlier in the case of floating rate securities, the date of the next interest rate reset of all the Fund's assets will be up to 60 days. The average time until the full principal must be repaid on all the Fund's assets will be up to 120 days. To calculate these averages, figures are adjusted to reflect the relative holdings of each of the Fund's assets.
- ▶ The Fund may also enter into reverse repurchase agreements on a short term basis to generate additional income. Through these, the Fund agrees to purchase securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price.
- ▶ The investment manager has discretion to select the Fund's investments.
- ▶ The Fund is a "Short Term Money Market Fund" as defined by the European Securities and Markets Authority. Details of the current credit ratings (if any) attributed to the Fund are available from www.blackrock.com/cash.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your shares will be distributing shares (i.e. dividend income will be reinvested daily or paid on the shares monthly where the net return of the Fund (i.e. the return less fees and expenses) is positive). For further information on the dividend policy please refer to the prospectus.
- ▶ The share class seeks to maintain a stable net asset value per share however this is not guaranteed.
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ On any day where the net return of the Fund (i.e. the return less fees and expenses) is negative the Directors may determine to redeem a number of shares equivalent to the amount required to maintain a stable NAV per share. This will take place by way of an automatic share redemption which will reduce the number of shares held by each investor on a pro rata basis. The redeemed shares will be cancelled and the value attributable to those shares will be retained by the Fund to offset the negative return, resulting in a loss of capital to investors
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is €1,000,000.

Global High Yield Bond Fund

A sub-fund of BlackRock Global Funds

Class D2RF EUR Hedged

ISIN: LU0368267034

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- ▶ The Fund invests globally at least 70% of its total assets in fixed income securities. These include bonds and money market instruments (i.e. debt securities with short term maturities).
- ▶ The fixed income securities may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development).
- ▶ At least 70% of the Fund's total assets will have a relatively low credit rating or will be unrated. The remainder may include investments which are investment grade (i.e. meet a specified level of credit worthiness) at the time of purchase.
- ▶ For the purpose of managing currency exposure, the investment adviser (IA) may use investment techniques (which may include the use of financial derivative instruments (FDIs)) to protect the value of the Fund, in whole or part, or enable the Fund to profit from changes in currency exchange rates against the base currency of the Fund. FDIs are investments the prices of which are based on one or more underlying assets.
- ▶ The IA may use FDIs to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The IA has discretion to select the Fund's investments and in doing so may take into consideration the BofA Merrill Lynch Global High Yield Constrained USD Hedged Index.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$100,000 or currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Non-investment grade fixed income securities are more sensitive to changes in interest rates and present greater 'Credit Risk' than higher rated fixed income securities.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2016. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

BlackRock Emerging Markets Government Bond Index Fund

A sub-fund of BlackRock Global Index Funds

Class I2 USD

ISIN: LU1064902957

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the J.P.Morgan Emerging Markets Bond Index Global Diversified, the Fund's benchmark index.
- ▶ The Fund aims to invest as far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the benchmark index.
- ▶ The benchmark index measures the performance of US Dollar denominated bonds issued by governments and government agencies that are 100% guaranteed or owned by the governments and government agencies of emerging markets countries.
- ▶ The FI securities include both investment grade (i.e. meet a specified level of creditworthiness) and sub-investment grade securities (i.e. have a relatively low credit rating credit or are unrated but deemed to be of comparable quality with sub-investment grade FI securities).
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index. They may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.

- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
