Chapter 11: Nutrition Across the Life Span

Copyright Goodheart-Willcox Co., Inc.

Across

1. A baby that weighs less than 5 ½ pounds (2,500 g) at birth.
5. An organ that forms inside the uterus during pregnancy in which blood vessels from the mother and the fetus are entwined, enabling the transfer of materials carried in the blood.
6. A child between one and three years of age.
9. The time during which a person develops sexual maturity.
10. The period of life between childhood and adulthood.
11. A baby born before the 37th week of pregnancy.
12. A condition existing from birth that limits a person's ability to use his or her body or mind.
13. A set of symptoms that can occur in a newborn whose mother drinks alcohol while pregnant.

Down

1. A series of stages through which people pass between birth and death.
2. A child in the first year of life.
3. A period of rapid physical growth.
4. A developing human from nine weeks after conception until birth.
5. The craving for and ingestion of nonfood materials such as clay, soil, or chalk.
7. The production of breast milk by a mother's body following the birth of a baby.
8. A span of about 13 to 14 weeks that represents one-third of the pregnancy period in humans.
