To install the "Wabbitemu" graphing calculator emulator on your PC, go to

<u>http://wabbit.codeplex.com/</u> and save the executable in a convenient location.

When you run the executable, you will see the menu below. Select "Create a ROM image using open source software"

Next, for the Calculator Type, select "TI-84 Plus SE":

Calculator	Туре		
Model	calculator would you like	to emulate?

🔘 TI-82	TI-83 Plus SE	🔘 ТІ-85	
🔘 ТІ-83	TI-84 Plus	O TI-86	

You will then be prompted to make an OS Selection. Select the option to download the OS files from TI's website and select the TI OS version "OS 2.53 MP":
