OTHER HELPFUL DETAILS

The Daily Racing Form: "The Form," as it is called, is the Wall Street Journal of the racing world. Just as the WSJ deals with stock information, The Form provides valuable and detailed analysis of at least ten past performance running lines on each of the horses in each race. The Form also provides editorial copy, selections and opinion.

The Track Announcer: Calls the action during each race and provides continuous updates of racing information such as late scratches, overweights & jockey changes throughout the day.

Money wagered on individual horse to win, place & show: 5265

WHAT THE ODDS MEAN

The odds do not represent each horse's chances of winning, but what bettors think those chances are, based on how they actually bet. Odds are based on the WIN pool only. The lower the odds on the tote board, the better the chances of that horse winning the race, in the estimation of the betting public. The odds are set by the amount of money the public bets on each horse.

2 Easy Steps TO MAKE A BET

There are two simple rules on how to make a bet. These rules are the same for placing a bet on a Turf Paradise live race or on any race from a simulcast track.

1 **Indicate Track & Race Number**
Example: Turf Paradise, Race 5
OR Santa Anita, Race 2

2 **Wager Amount, Type of Bet & Program Number**
Example: \$2 to win on Number 6
OR \$5 exacta, 2-7

Correct Examples:
Turf Paradise, Race 5, \$2 to win on Number 6 **OR** Santa Anita, Race 2, \$5 exacta, 2-7

Advanced WAGERING

Boxing Horses

Calculating how much your bet will cost when you box a bet, you get all the combinations of the horses you selected.

\$1 Quinella Box

Total number of horses you want to box times the total number of horses you want to box minus 1, divided by 2.
Example: A \$1 Quinella Box involving 4 horses.
 $4 \times (4-1) = \$12, \$12 \div 2 = \$6$

\$1 Exacta Box

Total number of horses you want to box times the total number of horses you want to box minus 1
Example: A \$1 Exacta Box involving 4 horses.
 $4 \times (4-1) = \$12$

.50¢ Trifecta Box

Total number of horses you want to box times the total number of horses you want to box minus 1, times the total number of horses you want to box minus 2, divided by 2.
Example: A .50¢ Trifecta Box involving 4 horses.
 $4 \times (4-1) \times (4-2) = \$24, \$24 \div 2 = \12

.10¢ Superfecta Box

Total number of horses you want to box times the total number of horses you want to box minus 1, times the total number of horses you want to box minus 2, times the total number of horses you want to box minus 3, times .10¢
Example: A .10¢ Superfecta Box involving 4 horses.
 $4 \times (4-1) \times (4-2) \times (4-3) = \$24, \$24 \times .10¢ = \2.40
