

# Checking Number of Devices Connected on Huawei ONT

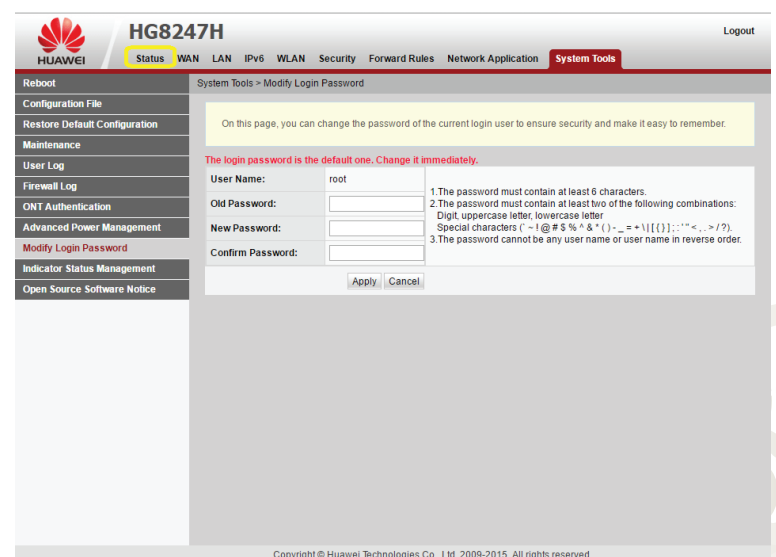

**Step 1:** Open Web browser and type 192.168.100.1 on address bar. Login page will appear:

**Step 2:** Type 'root' in Account field and 'admin' in Password field (as default credentials unless they are changed) and click on login button:

**Step 3:** Click on 'Status' tab:

**Step 4:** Click on 'User Device Information':

On this page, you can query the basic information about the user device, including the host name, device type, IP address, MAC address, and device status.

Host Name	Device Type	IP Address	MAC Address	Device Status	Application
android-b389080a	dhcpcd-5.5.6	192.168.100.106	3c:bb:fd:32:d2:ce	Offline	Details Delete Network Application
iPhone	--	192.168.100.104	64:a3:cb:6b:38:44	Offline	Details Delete Network Application
SyedNavidsiPad	--	192.168.100.102	b8:e8:56:5c:41:b9	Offline	Details Delete Network Application
android-80ce29de	dhcpcd-5.5.6	192.168.100.103	e0:99:71:8a:7:aa	Offline	Details Delete Network Application
SKH	MSFT 5.0	192.168.100.101	28:e3:47:51:42:4e	Online	Details Share Access Network Application
