

We made the *Inc.* 5000 list of Fastest Growing Companies in America!

Aerodyne Industries ranks # 2,415 in 2019

It is considered one of the most exclusive clubs in business and we are members of it!

For 37 years, *Inc.* has recognized the fastest growing private companies in America and Aerodyne Industries was named an honoree on the *Inc.* 5000 for 2019.

"This year's set of winners set the bar very high indeed," James Ledbetter, Editor in Chief, wrote in his congratulatory letter to Andrew Allen. "Companies that made the list, on average, have grown nearly six fold since 2015."

Aerodyne's record speaks for itself with revenue growth of 165% since 2015. The total earned a ranking of 2,415 overall and 130 in the category of Government Services.

Number one overall was Freestar (36,680% growth), an advertising and marketing firm in Phoenix. One spot above us in the rankings is Einstein Moving Company in Austin, TX with 166%.

(So if you plan any moves in the next year, please do not give them the business! Kidding...sort of.)

Ledbetter also noted as an *Inc.* 5000 honoree, we now share a pedigree with Under Armour,

Microsoft, Oracle, GrubHub and "dozens of other alumni that have gone on to become household names."

"Congratulations to you and your team," he wrote. "You should be very proud of all Aerodyne Industries has achieved to date."

A celebration will be held at the *Inc.* 5000 Gala in Phoenix in October, but Andy Allen wanted to congratulate those who made a difference — *you* and our customers.

"We are extremely proud of this recognition from such a reputable organization," he said. "Our phenomenal growth is not only a direct result of the outstanding team we have across the country, but it reflects the tremendous opportunities we have been given from our customer base. We are very grateful."
